## BENEFITS

- Can be used on LibertyLink®, Roundup Ready®, Roundup Ready® 2 Xtend, or non-GMO soybeans.
- Can also be used in an Enlist Duo® herbicide system on Enlist E3™ soybeans.
- Excellent foundational broadleaf herbicide for unmatched residual control of small-seeded broadleaf weeds. Controls waterhemp, pigweed, nightshade, lambsquarters, kochia, morningglories, smartweed, velvetleaf, wild buckwheat and nutsedge.
- Provides excellent suppression of early-season grasses (foxtails, shattercane) to allow for reduced postemergence trips in-season.
- For resistant weed populations, use higher rate in recommended rate range from label for longer residual control.
- Tank mix with other herbicides for full-season grass control or use as part of a planned pre/post program.
- For no-till, add Aim® EC herbicide 0.75 fl. oz. + 2,4-D 1 pt./A + COC 1% or other appropriate burndown program.
